Opis

HDM 1 multi is a modulator for conversion of a HDMI signal into a DVB-T/-C / DTMB or ATSC-T/-C channel. The HDMI input supports all video resolutions up to 1080/60p.

A loop-through input is available for connection with external signal sources. The device is flexible and can process HDMI signals from receivers, computers, cameras, DVD players and many other devices. The modulator is operated with the supplied plug-in power supply unit.
