Opis

AV encoder module - digitalizacija Audio/video signala

The AV encoder module converts analog video (CVBS) and audio signals from a set top box, a DVD player, a camera or other sources, into a MPEG2 or MPEG4 data stream. This data stream is then available in the TDX pool and can be sent out on all TDX output modules. Teletext and WSS signaling in the analog signal are also converted into the MPEG2/4 stream. When configuring your system, it is optional in which slots you place the AV input modules in the input section. When servicing your system, it is possible to remove an input module from a module slot (HOTSWAP). Just use your fingers to press the fastener downwards and then pull the module outwards to remove it. A 15pol Sub-D / 3xRCA cable used to connect the source to the AV module is also available.

Composite video input
Stereo Audio input
Teletext supported
Colour standards: PAL, SECAM, (NTSC)
Constant bit rate up to 10 Mb.
HOT SWAP service
Selectable encoder output bandwidth (TDX-GUI)
Remote update via TDX system interface

Technical specifications
EAN number: 5702664920803
Input frequency range: 50-20,000 Hz
Input level: IF Bandwidth: 7/8 MHz
Audio input level: Audio S/N ratio: >55 dB
Power supply: TDX headend
Dimensions: LxWxH 29x126x53 mm
Weight: 0.5 kg
